### INSTRUCTIONS

**Step 1.** Choose an existing leaf shaped design or scan in your own drawing into the Scan N Cut machine. Follow the directions to cut out multiple designs from various coloured papers. If you don't own a Scan n Cut, find or draw a template and trace around and cut out manually. (Note: This will add a lot of time to the project)

**Step 2.** Once all shapes are cut out there to assemble your design. We have used a simple circle shape. Start on the outside edge of the circle and stick down each leaf with double sided tape. Leave a small space between each leaf.

**Step 3.** Start layering the leaves working inwards and sticking each leaf in the gaps of the layer before it.

**Step 4.** Continue this process all the way into the centre of the artwork until the shapes overlap in the center.

**Step 5.** Use a hot glue gun to glue down a gemstone to cover the middle of where the paper overlaps.

**Step 6.** Hang canvas on wall!
