FELT ANIMAL GARLAND

Step 7 – To finish hang your animal garland on a wall or door and enjoy!

e EASY

WHAT YOU'LL NEED

- Arbee Assorted Felt Pack
- Pencil
- Scissors
- Hot Glue Gun
- Twine or cord for hanging

INSTRUCTIONS

Step 1 – Draw your own animal designs onto card. Draw all the body pieces individually so you can cut each piece out of different coloured felt. If you aren't confident in designing your own animal templates you can find references online.

Step 2 – Cut out felt sheets with scissors and group all the pieces for each animal in piles to avoid confusion.

Step 3 – Once all your pieces are cut out you can start to assemble your animals. Turn on the hot glue gun and starting with the face pieces use a small amount of the hot glue on the back of the felt and stick each piece in place according to the templates.

Step 4 – Once the faces are complete you can assemble the body of each animal, use hot glue again to glue the belly and tail onto the main body piece.

Step 5 – Now that the head and body are complete, use hot glue again to join the 2 pieces at the centre back of the head. You want the face to be free to hang over the cord for hanging later on so be sure not to glue the whole head down onto the body.

Step 6 – Once you have attached all the pieces for each animal, they are ready to hang. Cut a piece of cord or twine and place each animal's head over the cord so it runs in between the head and body pieces. If you use the hot glue gun to attach the felt animals to the cord.
