DIY CERAMIC UNICORN BAUBLES

e EASY

WHAT YOU'LL NEED

- Sculpey
- Sculpey tools
- J&J DIY Ceramic Bauble Round, 8cm
- Paint and paint brushes
- Paper flowers
- Felt
- Scissors
- Hot glue gun and glue sticks
- Black marker

INSTRUCTIONS

Step 1 – Start by creating the unicorn horns out of Sculpey. Roll 2 long sausage shapes out of 2 different coloured Sculpey and then twist them together to a point. Chop off the thicker end using the Sculpey tools to create a flat edge at the base of the horn.

Step 2 – Repeat with different colours for multiple horns. Once you have all your horns ready, place between 2 pieces of baking paper and bake in the oven following the package instructions. Once baked, leave to cool.

Step 3 – Paint the ceramic baubles in your chosen colours.

Step 4 – While the baubles are drying, cut out ear shapes from the felt.

Step 5 – You can now begin to assemble your unicorns. Using the hot glue gun, glue on the horn and surround it with the paper flowers to create a flower crown. Then glue the felt ear in position too.

Step 6 – To finish use the black marker to draw your unicorns face onto the front of the bauble.
