DIY CHRISTMAS WREATH

e EASY

WHAT YOU'LL NEED

- 45cm DIY Christmas Wreath
- Jolly & Joy 50 Battery Operated LED Lights Warm
- Red ribbon
- Gold beaded garland
- Berry Pick Red small
- Berry Pick Red large
- Bell Bows x 4
- Faux snow
- Leaves
- Pinecone

INSTRUCTIONS

Step 1 – Firstly take the string of lights and wrap around the wreath. In this project, we used a string of warm lights, but you can also use a cool lighting if that's a better look for your room. To keep the look clean, hide the wire and the battery in the branches.

Step 2 – Using a red ribbon, start from one end and loosely wrap it around the wreath, creating a swirl flow. Once you get to the other end tie the ribbon together at the back and cut an excess ribbon off. In the opposite direction, use the same method and wrap the gold beaded garland.

Step 3 – Starting with the bottom centre to create a focal point, attach ribbon bows with bauble bells and a touch of faux snow. To add further dimension, create clusters of small berry pick bouquet with leaves and pinecones one the on one side of the wreath. Phasing out the cluster with some large red berry pick and additional leaves on both ends of the wreath.

Step 4 – Complete the project by spacing out bell bows on the wreath.
