FISKARS PAPER WREATH

e EASY

WHAT YOU'LL NEED

- Fiskars Squeeze Punch Circle Large
- Fiskars performance 8" scissors
- Hot glue gun and glue sticks
- A3 piece of paper
- Metallic papers
- Metallic ribbon

INSTRUCTIONS

Step 1 - Cut a circle out of the A3 piece of card about 45cm in diameter.

Step 2 - Then draw another circle inside about 25cm in diameter and cut out the inner circle with scissors to create a wreath shape. This will be the base of your wreath.

Step 3 - Use the Fiskars circle punch to cut out lots of circle shapes from the metallic paper.

Step 4 - To ensemble the wreath, use the hot glue gun to glue the circles onto the paper wreath shape. Continue layering and gluing the circles until the whole wreath is filled and there are no gaps.

Step 5 - Create bow out of metallic ribbon by cutting some ribbon and loop it back on itself and secure in the centre with the hot glue gun. Cut another piece and loop it over the middle of the bow and secure at the back. Lastly cut 2 more strips of ribbon and glue to the back of bow to create the bow ties. Glue bow onto wreath.

Step 6 - To finish hang on wall or door using double sided tape.
