# GLASS COAT LIQUID GLOSS DIY TRINKET DISH

**e** EASY

## WHAT YOU'LL NEED

- Glass Coat Liquid Gloss Trinket Dish DIY Kit
- Glass Coat Liquid Gloss Accessories Kit

## INSTRUCTIONS

**Step 1** - Prepare your working area and trinket dish mould by wiping them clean. Place the protective mat on the working area for surface protection.

**Step 2** - Before pouring the resin, add the gold foil flakes by spreading it across the mould to your desired effect.

**Step 3** - To create the ombre colour effect, three batches of resin will need to be made, each cup containing 40ml of resin in total. Start by adding 20ml of Liquid Gloss Part A and 20ml of Liquid Gloss Part B in a measuring cup and mixing well with a wooden stick. Repeat for the next two batches.

**Step 4** - Add a small drop of white paint in the first cup, a small drop of red paint in the second cup, a small drop of white paint and red paint in the third cup then mix each cup well with the mixing sticks provided.

**Step 5** - Pour the resin created into the trinket dish mould to create your own unique pattern design.

**Step 6** - Allow 48hrs for the resin to cure. Once set remove from mould.

\*\*Please read the enclosed information sheet in your resin kit carefully for best results. Remember to always wear protective gloves throughout the process and ensure your work area is well ventilated due to fumes.
