MOUNT	<input type="checkbox"/> Inside Mount (Recess) <input type="checkbox"/> Outside Mount (Fade)	<input type="checkbox"/> Inside Mount (Recess) <input type="checkbox"/> Outside Mount (Fade)	<input type="checkbox"/> Inside Mount (Recess) <input type="checkbox"/> Outside Mount (Fade)	<input type="checkbox"/> Inside Mount (Recess) <input type="checkbox"/> Outside Mount (Fade)
QUANTITY				

Note: When inside mounted, an approximate gap of 30mm between fabric and frame will be present to allow for fittings.

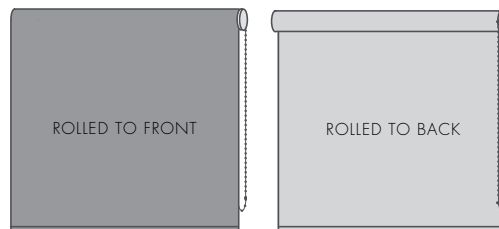

ORDER FORM - ROLLER BLINDS

Roller blinds offer a practical and affordable window dressing solution. Roller blinds are available in a wide selection of fabrics and textures, and traditional to modern styles.

Available Sizes

Single Roller Blinds are available in maximum widths between 2100mm and 3000mm dependent on fabric choice and a maximum drop of 3500. For widths over 2100 two roller blinds (side by side) are recommended.

How to Measure

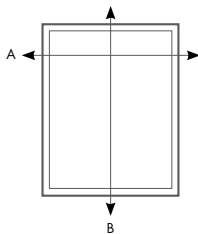

We've made it easy to customise your Spotlight blinds for any window in your house. We recommend using a steel tape for the most accurate measurement (cloth tape should not be used).

STANDARD MOUNTS

OUTSIDE MOUNTING

For width 'A', measure from one edge of the architrave to the other at the top of the window where the blind is to be installed.

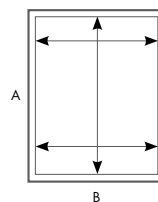

For height 'B', measure from one edge of the architrave to the other.

INSIDE MOUNTING

For width 'A', measure inside the window frame from one edge to the other in 2 places.

For height 'B', measure inside the window frame from one edge to the other in the centre.

MEASUREMENT TIPS

- Decide if the blind is more suited to being installed INSIDE or OUTSIDE of the architrave
- Fill in measurements in millimetres
- The most important measurement is the top of the window as this is the widest part of the blind and where it is installed
- Use a metal tape measure
- Do not make any allowances for the blind; just measure the inside or outside of the architraves
