PAUA SHELL PLANTER BOWL

e EASY

WHAT YOU'LL NEED

- An Ocean Shell Studios Paua shell
- Small indoor plants such as succulents (a good variety is Echeveria)
- Soil
- Ocean Shell Studios Paua shell pieces
- Beach shells/ pumice/ stones (Optional)

INSTRUCTIONS

Step 1 – Fill the Ocean Shell Studios Polished Paua Shell with a layer of soil, then plant your plants.

Step 2 – Carefully form a layer of Paua shell pieces by placing them around the plants or succulents – covering the entire soil layer.

Step 3 – (Optional) Add your own touch with beach shells, pumice or stones!

TIP

Succulents can grow inside if there is a natural light source. They should not be overwatered. They grow best when watered or “misted” every two weeks. (artificial succulents can be used instead).
