INSTRUCTIONS

Step 1 - Start by tracing out the pattern of your spots on the hat. We used a \$1 coin to create the circle shape.

Step 2 - Then using a needle and thread bead the outside shape of each circle, securing each bead individually.

Step 3 - Once all the circumferences of each circle are complete you can then fill them. Carefully put a dollop of PVA glue in each circle and then sprinkle the beads inside to fill it. Ensure the beads are spread evenly and facing the right way up and leave to dry. Repeat for each circle until all circles are filled. Alternatively, you can hand sew all the beads in the circles, but this will be very time consuming.

Step 4 - To finish place a red ribbon around the outside of the crown and secure with a little bit of glue.
