

Easy

Polar Fleece
**REVERSIBLE
BEANIE**

WHAT YOU'LL NEED

- 0.3m Polar Fleece each royal and red
- Scissors, matching thread, sewing machine

STEP ONE

Cut 2 rectangles measuring the circumference of the head x 22cm from both colours of Polar Fleece. For each colour, join the 2 short edges together, right sides together with 1cm seam allowance creating a cylinder, this is the centre back seam.

STEP TWO

Fold each colour in half with the centre back seam at the middle, see diagram. Round off the corners as shown and sew seam.

STEP THREE

With right sides together pin both colours of polar fleeces together at the bottom edge and sew the seam, leaving a 10cm opening. Pull the beanie to the right side and hand-sew the opening. Topstitch the beanie 1cm from the bottom edge.
