ROYAL CROWN

i BEGINNER

WHAT YOU'LL NEED

- Crayola Model Magic Yellow 113 g
- Metallic Acrylic Paint (optional)
- Semco Gems Mix 100 Pack Multicoloured
- Crafters Choice Tacky Glue White 60 mL
- Maria George Self Cover Headband White
- Semco Everyday Double-Sided Ribbon Gold

INSTRUCTIONS

Step 1 - Step 1 – Using the Crayola Model Magic create a ball. Using your thumb make a hole in the center like a donut and begin to stretch out and flatten the model magic.

Step 2 – Once the crown is your desired size, take the scissors and cut triangles around the top edge to form points. Allow the crown to dry following the directions on the packaging.

Step 3- (optional) Using the metallic paint, paint a shiny layer of gold all over the crown.

Step 4- Once the paint is dry, use the tacky glue to adhere gemstones around the outer face of the crown.

Step 5 – While the crown dries, take the headband and coordinating ribbon. Apply a dab of glue to one end of the headband on the underside and begin to wind the ribbon around the frame. Apply small dabs of glue to the underside of the band as you wind around. Once completed, cut the ribbon and glue the loose end to the underside of the frame.

Step 6- Take the dry crown and apply two small dots of glue to opposite points on the underside and press onto the headband. Allow the glue to dry before wearing.
