## SAFARI FACE PAINT

**e** EASY

### WHAT YOU'LL NEED

- Face paint
- Brushes
- Black eye pencil

### INSTRUCTIONS

**Step 1** – Using the yellow face paint, paint around the eyes and down to the mouth leaving the middle of the face blank.

**Step 2** – Using the brown face paint, paint on the giraffe 'horns'. To do this, draw two circles and then a vertical line to the head.

**Step 3** – Use light upward strokes to draw in the tuft of hair between the horns.

**Step 4** – Using the black pencil, outline the horns and the top of the yellow to form the ears.

**Step 5** – Use the brown face paint to draw two lines inside the giraffe ears for dimension.

**Step 6** – Use the black pencil again to outline the yellow to shape the nose. Draw in the nostrils.

**Step 7** – Use the black face paint in fine strokes to draw in the eyelashes at the corner of the eye.

**Step 8** – Use the brown face paint to add a line under the eyes for definition.

**Step 9** – Still using the brown face paint, draw different sized triangle shapes for the giraffe markings. Outline these in black to add dimension.

**Step 10** – Use the black face paint to make fluffy lines around the bottom of the nose.

**Step 11** – With the yellow face paint, draw a thin yellow line down the neck and outline with the black pencil.

**Step 12** – Using the brown face paint, make the same brown markings down the giraffe neck. Outline in black. Handy hint - Use a brush to get good coverage with cream paints
