- Ribtex Play Jewels Wood Flowers
- Ribtex Millefiori Flower Shape Bead
- Ribtex Jewellery Findings Screw in Eyes
- Ribtex Jewellery Findings Jump Rings
- Ribtex Jeweller Findings Shepherds Hook Earrings
- Ribtex Jewellery Accessories Key Ring

INSTRUCTIONS

Resin Summer Alphabet Key chains:

Step 1 - Pour a small amount of clear resin into the Ribtex alphabet mould, place in millefiori flower beads and/or polymer clay flowers into the letter.

Step 2 - Fill remainder of letter with clear or colored resin.

Step 3 - Leave in UV light to cure (natural sunlight or UV lamp/torch)

Step 4 - De-mould your project. *Tip - Flip the mould upside down and leave under UV light to ensure both sides of your project is cured before de-moulding.*

Step 5 - Use a screw in eye at the top of the resin letter, open a jump ring and loop through the screw in eye.

Step 6 - Using the open jump ring place on a wooden flower and close ring. On the other side of the flower add another jump ring.

Step 7 - Loop onto the open jump ring the large split ring of the key chain and close.

Resin Summer Earrings:

Step 1 - Place into the earring mould the polymer clay flowers, pour on top the opaque light blue resin.

Step 2 - Cure/ dry by placing under UV lamp/torch or near natural sunlight.

Step 3 - Once fully cured the resin will no longer be tacky, de-mould from the silicone.

Step 4 - Open a jump ring and thread through the top of the resin piece, thread through a wooden flower and close.

Step 5 - At the other end of the wooden flower thread through another jump ring and the shepherds hook earring. *Tip - Ensure you make two at a time for the perfect pair of earrings!*

Resin Summer Coaster:

Step 1 - Place Ribtex Play Jewels Wooden Flowers into a coaster mould.

Step 2 - Cover in clear resin to halfway, do not fill the whole mould.

Step 3 - Cure/ dry by placing under UV lamp/torch or near natural sunlight. *Tip - The larger and thicker the project the longer it may take to cure.*

Step 4 - Once cured pour on coloured UV resin. Leave to cure under UV light.

Step 5 - When fully cured the resin will no longer be sticky and can be easily de-moulded from the silicone.
