TIMBER BEACH SIGN

Nº 12.19.28
PROJECT SHEET

TIMBER BEACH SIGN

e **EASY**

WHAT YOU'LL NEED

· 3 x 'Francheville' timber signs
· Acrylic paints – white, blue and black.
· Sponge
· Water
· Small paint brush
· Wooden beads x 4

INSTRUCTIONS

Step 1 – Pour a small amount of paint onto each timber panel and using water and the sponge spread the paint across the timber to give a washed effect. You can mix the white and blue beforehand or while it's on the timber with the sponge. Leave to dry.

Step 2 – Once the paint is dry on each timber panel use a pencil to light draw on your letters to spell out a saying of your choice. Use different fonts on each one to create an interesting design.

Step 3 – Using the fine paint brush and the black and white paint, paint over your pencil design carefully.

Step 4 – Once all the paint is dry you can assemble your boards. Using scissors cut the hanging cord of your bottom 2 panels and thread some of the wooden beads through the cord. Then tie the cords to the board above until they are all attached.

Step 5 – Hang to finish!
